

9 JAN 1969

The Honorable Joseph D. Tydings, Chairman
Subcommittee on Improvements in Judicial Machinery
United States Senate
Washington, D. C. 20510

My dear Mr. Chairman:

This letter is a follow-up to our recent meeting with Mr. M. Albert Figinski, of your Subcommittee, concerning your kind letter of 18 December 1968 on our work with the Administrative Office of the United States Courts on the computerized translation of stenotype notes.

Mr. Ernest C. Friesen, Jr., the Administrator of the U.S. Courts, contacted us in June 1968 regarding techniques we had developed for the computerized translations of foreign language material using stenotype tape. We were glad to share our experience in this field and processed about 100,000 words of court reporter's notes under our program for Mr. Friesen. We believe this experiment has provided him with a basis for determining whether to proceed further with a private contractor.

Agency research in this field is presently being phased out, but we will remain alert to the importance of sharing any new developments which may have application to the rapid production of transcripts in the Judicial system.

We much appreciate your letter and are glad to know that our work may be of some value to the Judicial system.

Sincerely,

Distribution:
